

DON'T JUMP – WE LOVE YOU!*

1. *Witchcraft is non-violent direct action*

(did you ever hear of a violent witch?)

2. The Bolshevik revolution was bloodless

(fewer people died than in accidents on a normal day)

3. The more powerful a revolution, the less violent

(the scientific revolution is invincible – bloodless because it conquers the enemy's mind)

4. We are armed only with peer-reviewed science

(the climate science community won't resort to violence but equally can't bow to force)

5. 'Don't jump, we love you!'

(capitalists have grandchildren too)

***During the 1929 Wall Street Great Crash, capitalists who'd lost out began jumping from skyscrapers**
